The Museum has a number of reindeer objects including objects made from reindeer fur, skin and milk. Reindeer live in the Arctic and North Pole areas which include parts of North America, Europe, and Asia. This reindeer hat is quick and easy to make. All you need is card, scissors, a stapler, and some decorating materials! Cut a strip of card roughly 11cm x 94cm to make a thick strip/band. Decorate your band anyway that you like. You might want to use fur, sequins, collage, colouring pencils etc. Then cut out the antler template and draw around it onto a piece of card twice, then cut it out. Staple the card band into a circle making sure it fits around your head (you may want to measure it around your head!) Then staple on the antlers, one on each side of the hat. Now your reindeer hat is ready to wear.

**you will need**

- card
- scissors
- stapler
- colouring pencils or crayons
- decorating materials
